Portfolio Manager

Portfolio Manager
 Pierre O. Py

Pierre co-founded Phaeacian Partners in October 2020. He has managed the Fund since its inception in 2011 and has 22 years of industry experience.

Highlights

Investment Objective

The Fund seeks to provide above average capital appreciation over the long-term while attempting to minimize the risk of capital loss.

Key Facts

- Value-based: Invests in high-quality companies whose stocks trade at a significant discount to intrinsic value
- Flexible: Holds cash in the absence of suitable investment opportunities
- Unconstrained: Benchmark agnostic: Invests across market caps, industries and geographies
- Concentrated: Focuses on best ideas to invest in a concentrated number of stocks

The fund performance data quoted here represents past performance, which is not indicative of future results. Current performance may be lower or higher than the performance data quoted above. Investment return and principal value will fluctuate, so that shares, when redeemed, may be worth more or less than their original cost. Current month-end performance data may be obtained by calling toll-free, (800) 258-9668.

1. The total operating expense ratio (including indirect expenses such as the costs of investing in underlying funds), as stated in the fee table in the Fund's prospectus dated October 13, 2020, is 1.31% (1.29% net of expense limitation agreement, contractually in effect through October 31, 2023).
2. The chart illustrates the performance of a hypothetical \$10,000 investment made in the fund since inception. Figures include reinvestment of capital gains and dividends, but do not reflect the effect of any applicable redemption fees, which would lower these figures. An investor cannot invest in an index. This chart is not intended to imply any future performance of the fund. Past performance is not a guarantee of future results.
3. Phaeacian Accent International Value Fund commenced operations on October 19, 2020, following the receipt of the assets and liabilities of the FPA International Value Fund ("the Predecessor Fund") through a reorganization into the Phaeacian Accent International Value Fund (the "Fund"). FPA was the investment adviser from inception through October 16, 2020, and reflects fees, charges and expenses of that vehicle for the time periods shown. Past performance is no guarantee of future results and current performance may be higher or lower than the performance shown. This data represents past performance and investors should understand that investment returns and principal values fluctuate, so that when you redeem your investment it may be worth more or less than its original cost. **Please consider the investment objectives, risks and charges and expenses of the Fund carefully before investing. The prospectus contains this and other information about the Fund. You may obtain a copy of the prospectus at www.phaeacianpartners.com or by calling (800) 258-9668 (toll free). Please read the prospectus carefully before investing.**
4. The MSCI All Country World ex-USA (Net) Index is an unmanaged float-adjusted market capitalization index that is designed to measure the combined equity market performance of developed and emerging market countries excluding the United States.

The Phaeacian Funds are distributed by Foreside Financial Services LLC.

Risk Considerations

Investments in mutual funds carry risks and investors may lose principal value. Stock markets are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, or economic developments. The Fund may purchase foreign securities, including American Depositary Receipts (ADRs) and other depository receipts, which are subject to interest rate, currency exchange rate, economic and political risks. Foreign investments, especially those of companies in emerging markets, can be riskier, less liquid, harder to value, and more volatile than investments in the United States. Adverse political and economic developments or changes in the value of foreign currency can make it more difficult for the Fund to value the securities. Differences in tax and accounting standards, difficulties in obtaining information about foreign companies, restrictions on receiving investment proceeds from a foreign country, confiscatory foreign tax laws, and potential difficulties in enforcing contractual obligations, can all add to the risk and volatility of foreign investments. Small and mid cap stocks involve greater risks and they can fluctuate in price more than larger company stocks. Returns on investments in securities of large capitalization companies could trail the returns on investments in securities of smaller and mid-sized companies. Value stocks, including those selected by the portfolio manager for the Fund, are subject to the risks that their intrinsic value may never be realized by the market and that their prices may go down. The Fund's investments in illiquid securities may reduce the returns of the Fund because it may not be able to sell the illiquid securities at an advantageous time or price. Redemptions by a large investor may affect the performance of the Fund, may increase realized capital gains, may accelerate the realization of taxable income or gains for shareholders and may increase transaction costs. The portfolio manager will apply investment techniques and risk analyses in making investment decisions for the Fund, but there can be no guarantee that these will produce the desired results. The Fund is heavily dependent upon Mr. Pierre O. Py for its operation and for the execution of its investment strategy. The Fund would likely find it more difficult to execute its investment strategy and to continue its operation in the event he were no longer involved in the management of the Fund. The Fund is non-diversified and may hold fewer securities than a diversified fund because it is permitted to invest a greater percentage of its assets in a smaller number of securities. Holding fewer securities increases the risk that the value of the Fund could go down because of the poor performance of a single investment.

Morningstar: The Morningstar Analyst Rating™ is not a credit or risk rating. It is a subjective evaluation performed by Morningstar's manager research group, which consists of various Morningstar, Inc. subsidiaries ("Manager Research Group"). In the United States, that subsidiary is Morningstar Research Services LLC, which is registered with and governed by the U.S. Securities and Exchange Commission. The Manager Research Group evaluates funds based on five key pillars, which are process, performance, people, parent, and price. The Manager Research Group uses this five-pillar evaluation to determine how they believe funds are likely to perform relative to a benchmark, or in the case of exchange-traded funds and index mutual funds, a relevant peer group, over the long term on a risk-adjusted basis. They consider quantitative and qualitative factors in their research, and the weight of each pillar may vary. The Analyst Rating scale is Gold, Silver, Bronze, Neutral, and Negative. A Morningstar Analyst Rating of Gold, Silver, or Bronze reflects the Manager Research Group's conviction in a fund's prospects for outperformance. Analyst Ratings ultimately reflect the Manager Research Group's overall assessment, are overseen by an Analyst Rating Committee, and are continuously monitored and reevaluated at least every 14 months. For more detailed information about Morningstar's Analyst Rating, including its methodology, please go to global.morningstar.com/managerdisclosures/. The Morningstar Analyst Rating (i) should not be used as the sole basis in evaluating a fund, (ii) involves unknown risks and uncertainties which may cause Analyst expectations not to occur or to differ significantly from what they expected, and (iii) should not be considered an offer or solicitation to buy or sell the fund.

The Morningstar Analyst Rating should not be used as the sole basis in evaluating a mutual fund. Morningstar Analyst Ratings are based on Morningstar's current expectations about future events; therefore, in no way does Morningstar represent ratings as a guarantee, nor should they be viewed by an investor as such. Morningstar Analyst Ratings involve unknown risks and uncertainties which may cause Morningstar's expectations not to occur or to differ significantly from what we expected.
