Dividend distributions are the net income from dividends and interest earned by fund securities. All mutual funds periodically distribute profits they earn to investors. By law, if a fund has net gains from the sale of securities, or if it earns dividends and interest from securities, it must pass substantially all of those earnings to its shareholders or it will be subject to corporate income taxes and excise taxes. These taxes would, in effect, reduce investors' total return.

The Fund intends to make distributions that are generally taxable as ordinary income or capital gains, except when your investment is in an IRA, 401(k) or other tax-advantaged investment plan. However, you may be subjected to tax when you withdraw monies from a tax-advantaged plan.
